2007 CotY Award - Residential Interior over \$100k
Project Description for PR purposes

The client had a 2100 SF unfinished basement and a whole host of needs. The wish list included: a wet bar, home theater, guest bedroom, workout area, office, recording studio, storage space, ¾ bathroom, and entertainment room for parties.

The client wanted to create a very contemporary design for her basement. She also had to maintain a tight budget to afford all of her wish list. Both of these goals were kept at the forefront of every selection considered. Work started in October 2006 and was completed in 17 weeks.

Architect – Designs by Mark, Mark Oser
